

Site Constraints Map Instructions – Rooftop & Carport Solar

Note: Unless specified, all site constraints map instructions apply to both rooftop *and* carport solar.

A GIS-based Site Constraints Map shall present a color map which includes the following:

- Developer name, project name and date created
- North arrow, bar scale
- Project parcel limits, project parcel numbers
- The building and building exterior area
- Project boundary
- Limits of development / limit of work / limits of disturbance
- Identification of and legend containing applicable exclusionary conditions present:
 - Leased area
 - Total leased square footage
 - Total usable square footage
 - Auxiliary equipment area
 - Easements / Rights-of-Way
 - Construction laydown areas for materials, equipment staging, etc.
 - Expected tree clearing for shade relief, temporary laydown, etc.
 - Creation of additional categories to show other known restrictions
- Within the developable area, identify locations where shading loss is greater than 5%. Present this data as a category in the map legend.
- Rooftop only: Building internal and/or external access to roof
- Equipment conduit plan/routes
- Electric utility distribution service entrance to building including voltage and utility meter location
- Point of Interconnection
- Fire protection
