Upcoming Construction in Your Community

Westcott Substation Grid Transformation Project

You are receiving this postcard to inform you of some upcoming work in your area. Construction will begin soon at our Westcott Substation located off Rose Lane in Falls Church, Virginia. This work is part of our Grid Transformation Plan, which will

modernize electric infrastructure and support integration of renewable energy resources onto the electric grid.

As construction begins, you may notice increased construction traffic along Slade Run Drive. You will also see temporary signage placed along the Holmes Run Trail to direct users along the rerouted path. Additionally, the existing substation will be expanded on property owned by Dominion Energy. Our crews will be removing vegetation around the substation to make room for the expansion. During this period, we do not anticipate any interruption to your electric service.
