BECO to DTC 230 kV Electric Transmission Line and Substation Project

At Dominion Energy, we are committed to updating you about projects in your community. We are building a new substation (DTC) and a new double circuit 230 kilovolt (kV) electric transmission line. The line will connect to our existing substation (BECO) in eastern Loudoun County, Virginia. This work will improve electric reliability for area customers.

MORE

Construction will begin later this year. As part of this project, we will clear 100 feet of trees within the right of way along the 1.3 miles between BECO and DTC substations. We will also begin preparing the DTC Substation site. All work is scheduled during the daytime.

There may be temporary traffic impacts on Route 28, Russell Branch Parkway, Gloucester Parkway, and Century Boulevard. During construction, sidewalks may be closed at times. All traffic impacts will be posted in advance in accordance with Virginia Department of Transportation (VDOT) permits. The trails at Vestals Gap Overlook Park will not be impacted.

The new transmission line is projected to be in service by mid-2025, and we anticipate DTC Substation completion in fall 2025.

We will update you on progress. Thank you for your patience and understanding as we complete this important reliability project.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

UPCOMING WORK

Late 2023: Begin right of way clearing and construction

Mid-2025: Complete new transmission line

Fall 2025: Complete DTC Substation
