Proposed Centreport 230 kV Electric Transmission Project

Dear Neighbor,

At Dominion Energy, we are dedicated to keeping our communities up to date on projects in their area. You are receiving this letter because we would like to provide an update to the Centreport 230 kV Electric Transmission Project. The project proposes a new substation, located on Centreport Parkway, and an associated double-circuit 230 kilovolt (kV) electric transmission line.

Our team would like to thank each property owner who attended our community meetings or contacted us with feedback on the project. Recently, our team made routing adjustments. The current routes are available for viewing in the enclosed map. You may also view these maps digitally on MapChat by ERM, which is located on our project website, DominionEnergy.com/centreport.

1. **The Yellow Route (Variation 2)** has been removed from consideration.
2. **The Blue Route (Variation 1)** has been renamed as Route 4. Additionally, the connection point to the existing electric transmission line has moved south to the same location as the Route 2 connection.

We are working to file an application with the Virginia State Corporation Commission (SCC) in early fall 2024. Multiple routes are being evaluated, and one proposed route with alternatives will be submitted to the SCC for final evaluation and approval. Only one route will be selected to construct.

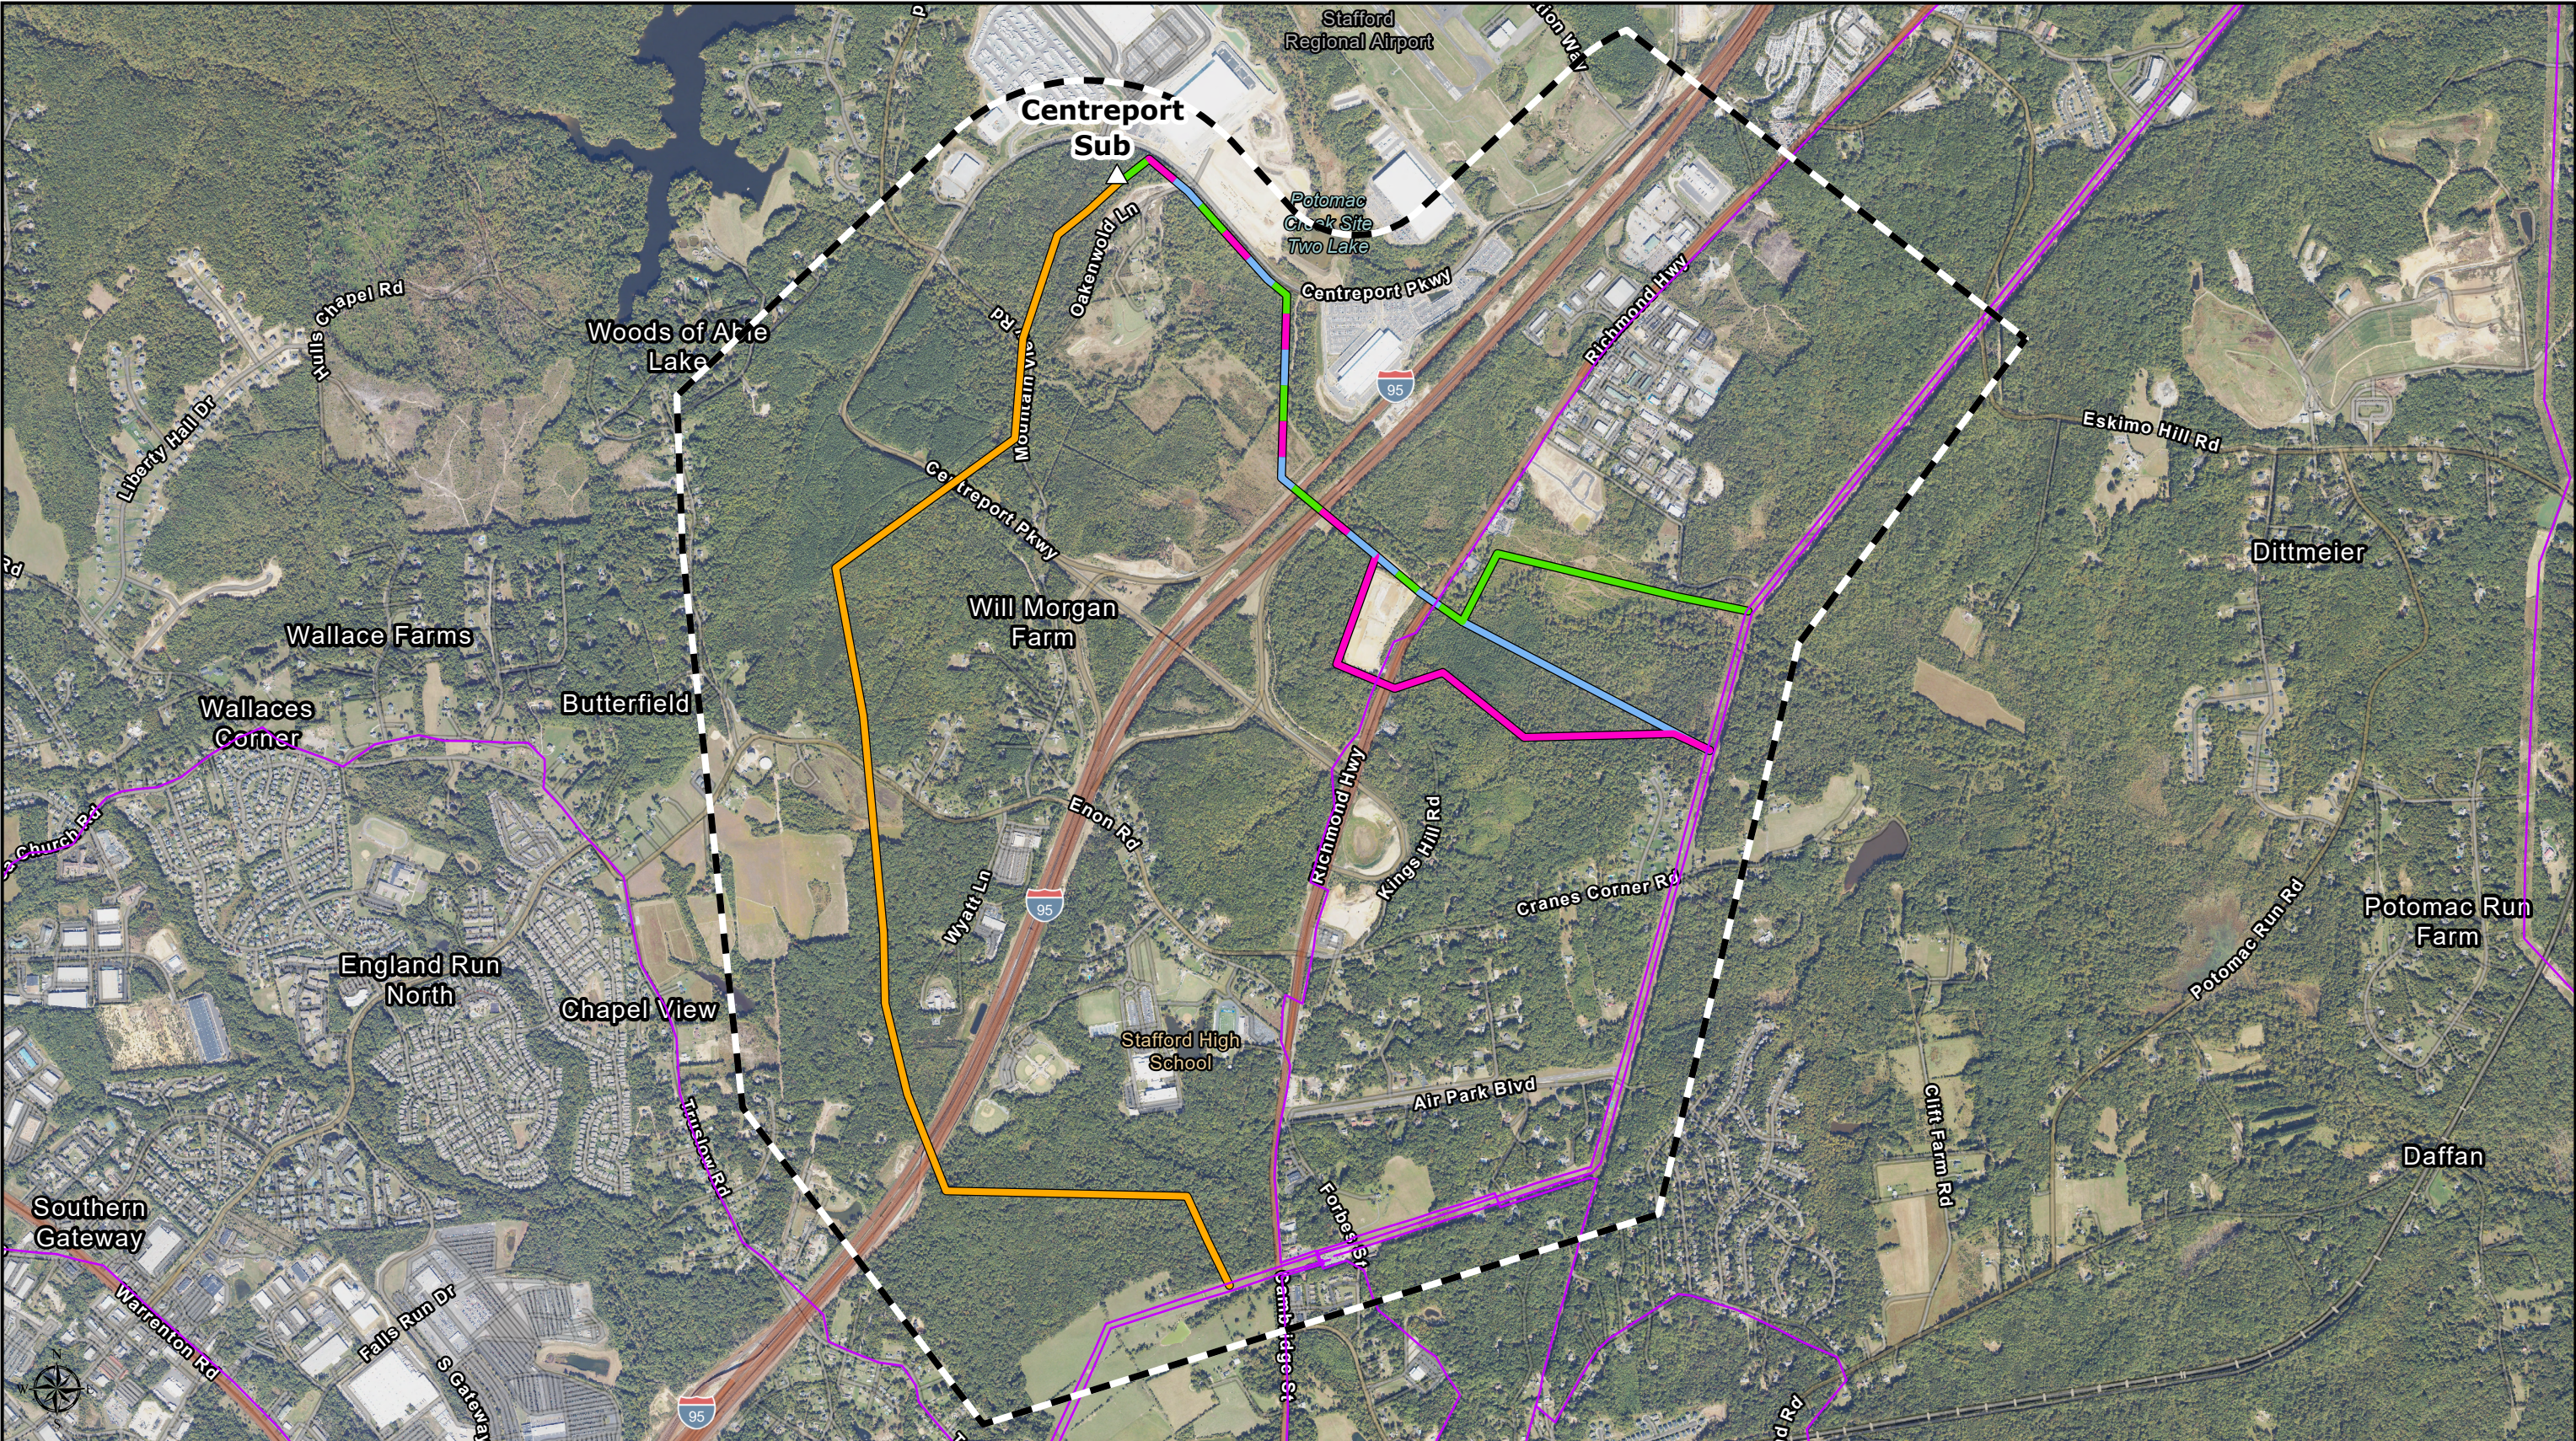

For questions about the project, contact our project team by email at powerline@dominionenergy.com or by phone at 888-291-0190.

Thank you for your understanding while we plan for long-term reliability investments in your community.

Sincerely,

The Electric Transmission Project Team
