Field Surveying

Commonwealth Energy Express

Dominion Energy's proposed Commonwealth Energy Express High Voltage Direct Current (HVDC) project was approved by PJM in February 2026. It would be the first HVDC electric transmission Line in Virginia, and will require Virginia State Corporation Commission (SCC) approval. Dominion Energy plans to file an application with the SCC in mid-2027, a 12 month review of the project is expected.

MORE

This project is proposed to be constructed underground, in the existing right of way. Utilizing the existing right of way allows for project planning activities to take place in those corridors prior to SCC approval. As a result, you may see crews in the right of way conducting field surveys and permitting activities.

Project details and information about upcoming community meetings and outreach can be found on the project website: DominionEnergy.com/CommonwealthEnergyExpress.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
