Line 514 Corridor Upgrade Electric Transmission Project

You will continue to have safe, affordable, and increasingly clean electricity as energy needs grow in Loudoun County. To support this, Dominion Energy is planning new and rebuilt 500 kilovolt (kV) and 230 kV transmission lines.

These lines will interconnect with other power utilities at the Potomac River and span approximately 3.5 miles south to existing substations. Where possible, this project will stay within the existing right of way.
