## Tunis to Boykins 115 kV Electric Transmission Line Rebuild Project

AT DOMINION ENERGY, we are committed to providing the latest information to the communities we serve. You are receiving this postcard to update you on our Tunis to Boykins 115 Kilovolt (kV) Electric Transmission Line Rebuild Project.

Construction was originally planned for 2023 and 2024. However, during field surveying we determined that some sections require two to ten feet of additional right of way. This space will ensure the new electrical wires are safe from nearby trees.

We respect your property and privacy. Real estate representatives will contact property owners directly to request permission to inspect property along our right of way. After you grant us access by returning the Route Inspection Authorization form, we will survey and mark the proposed right of way expansion. Please visit [DominionEnergy.com/RightOfWay](https://www.dominionenergy.com/RightOfWay) to learn how we maintain property rights and a safe right of way.

Construction is tentatively scheduled to begin in January 2025 in Tunis, North Carolina. Work is expected to reach the Town of Murfreesboro in summer 2025, and finish in Boykins, Virginia by the end of 2026.

We will update you as activities progress. Thank you for your patience and understanding as we work to complete this important reliability project.

AT DOMINION ENERGY, protecting the grid and making it secure against natural and man-made acts is a top priority. We work alongside government officials to prepare for potential incidents that could affect our ability to provide electricity safely and reliably to the communities we serve. Learn how we're keeping you safe at [powerlines101.dominionenergy.com](https://www.powerlines101.dominionenergy.com).
