Green-e[®] Energy Eligible New Renewables² in Dominion Energy Green Power[®]

2024 Historical Product Content Label	2025 Prospective Product Content Label
 <p>GENERATION LOCATION Solar: FL, GA, LA, MS, SC, and VA. Wind: MO.</p>	 <p>GENERATION LOCATION Solar: FL, VA, OH, IN, IL, WV, TN, NC, SC, GA, MS, AL, LA or AR. Wind: PA, DE, DC, VA, OH, IN, IL, MD, WV, or MO</p>

1. The historical figures reflect the actual resource mix of electricity delivered to Dominion Energy Green Power[®] customers in 2024. The prospective figures reflect the renewables that we are contracted to provide for 2025. Actual 2025 figures may vary from the prospective 2025 figures according to resource availability. We will report the actual 2025 resource mix of the electricity you purchased in the form of the Historical Product Content Label before August 1, 2026.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product may include generation from a facility that is approved under a strict set of criteria as repowered or a facility that is approved for extended use by Green-e[®] Energy.

For comparison, the 2024 average mix of resources supplying Dominion Energy Virginia included: Coal (5.7%), Nuclear (27.3%), Gas (41.6%), Oil (.1%), Hydro (.6%), Renewables (Solar, Biomass and Wind) (2.3%), Storage (Net) (-0.6%), Purchases (Net-PJM and PPA) (23.0%) [Dominion Energy Virginia, 2024 data].

The typical Dominion Energy Virginia customer uses 1,000 kWh per month [Dominion Energy Virginia, 2024].
