

With finishing touches by Dominion Energy volunteers, students at this Boys & Girls Club can now enjoy everything their clubhouse has to offer for the first time in years. In 2018, a fire destroyed the Boys and Girl's Club of the Northern Neck, dispersing its programs and kids to other facilities across the area. With a revamped teen center, recreation equipment, and light-filled spaces, the club is welcoming back its community youth to their new, state-of-the-art home.
