Beaumeade to Buttermilk Reconductor Project

AT DOMINION ENERGY, we are committed to continually reviewing and analyzing our energy infrastructure to provide safe, reliable, and affordable electricity to the communities we serve. You are receiving this postcard because we are preparing to make upgrades to an existing transmission line near your property in Loudoun Country that will allow us to enhance electric service reliability.

We are scheduled to begin surveying the area in the next few weeks. As part of this work, you may see crews entering within the existing electric transmission corridor adjacent to your property.

You can expect to see personnel on foot or in vehicles entering the right of way, which may include use of access roads outside the right of way. Our field access may include wetlands delineation and soil boring activities. Our survey crews may also place boundary flags and occasionally obtain small soil and/or vegetation samples. In addition, surveys may require digging (holes approximately one foot in diameter) and screening soils to determine if any artifacts exist.

If further studies are needed beyond the boundary of the transmission corridor, a Dominion Energy representative will contact you.

We do not anticipate any interruptions to your electric service due to this work.
