Churchland to Hodges Ferry 115 kV Electric Transmission Rebuild Project

Dear Neighbor:

At Dominion Energy, we are dedicated to finding the best solution for our long-term energy needs in the communities we serve. You are receiving this letter because construction is scheduled to begin on the Churchland to Hodges Ferry 115 kV Electric Transmission Line Rebuild Project in the cities of Chesapeake, Suffolk, and Portsmouth, Virginia. This work is necessary to maintain service reliability for our customers.

As part of this project, we will rebuild 5.2-miles of the existing transmission line between our Churchland and Hodges Ferry substations with new structures that are similar in height and appearance. This section of the line was originally constructed on wooden H-frame and pole structures in 1957 and no longer meets our current electric reliability standards.

Construction will occur as follows, pending any technical or inclement weather delays:

- Preconstruction activities, including tree/brush clearing in and around the right of way and building access roads with wooden matting to protect existing vegetation begins in summer 2022
- Construction begins in August 2022
- Construction ends in December 2022
- Restoration activities continue through spring 2023

Your electric service is not expected to be interrupted as a result of this project. We are committed to working safely and courteously in your neighborhood and will restore the right of way once work is complete. As the project progresses, additional construction updates will be provided.

Please maintain a safe distance from construction sites for your protection and to allow our crews to work safely. Because we will be working in residential backyards, adults should ensure children and pets do not enter the work areas for everyone's safety.

For more information about this project, visit [DominionEnergy.com/churchland](https://www.dominionenergy.com/churchland). For more information about our construction process, visit our website at [powerlines101.dominionenergy.com](https://www.powerlines101.dominionenergy.com).

We are working to minimize the impact of this important project. Thank you for your patience and understanding. For questions or concerns, please contact us by calling 888-291-0190 or by sending an email to powerline@dominionenergy.com.

Sincerely,

The Electric Transmission Project Team
