### **Proposed White Oak Electric Transmission Project**

Dear Neighbor,

At Dominion Energy, we are dedicated to keeping the communities we serve informed of projects in their area. You are receiving this letter because we would like to provide important updates to our proposed White Oak Electric Transmission Project.

First, we would like to thank each community member who attended our community meetings in fall 2022 and/or reached out to our team with questions and suggestions to improve our plans. Proposing the best possible routes that minimize impacts to the area requires thorough studies and speaking with the communities who know the area best. Our team has spent the last few weeks incorporating community changes into our plans where possible, and we will update GeoVoice soon.

During our most recent community meeting on Nov. 17, 2022, our team stated our intention to file an application with the Virginia State Corporation Commission (SCC) by the end of 2022. Routing studies are still underway, and we will not file in 2022. Information will be provided in early 2023 about the status of the studies and our new filing date. As a reminder, our application will identify one proposed route with alternatives. Only one route will be selected to construct.

More information is available on our website, [DominionEnergy.com/whiteoak](https://www.dominionenergy.com/whiteoak). You can also contact our project team by email at [powerline@dominionenergy.com](mailto:powerline@dominionenergy.com) or by phone at 888-291-0190. Thank you for your understanding while we plan for long-term reliability investments in your community.

Sincerely,

The Electric Transmission Project Team
