

SCHEDULE CBOT  
NON-RESIDENTIAL BUILDING OPTIMIZATION PROGRAM

I. PURPOSE

The Non-Residential Building Optimization Program (“Program”) provides qualifying non-residential customers with incentives for the installation of energy efficiency improvements through recommissioning measures. The Program includes control system audits and tune-up measures in facilities with Building Energy Management Systems.

The Company, through its Program implementation vendor, will enroll qualifying contractors in the Program. A list of contractors enrolled in the Program will be provided on the vendor’s website. In addition, the Program will have a dedicated website to communicate Program details, identify available installation contractors, as applicable, and obtain incentive applications.

II. AVAILABILITY

The Program is voluntary and available to qualifying non-residential customers (customers in the Commercial, Public Authority and Industrial classes) and provides an incentive to install energy efficiency measures, including: schedule lighting, schedule HVAC, temperature setback/setup, condenser water temperature reset, discharge air temperature reset, static pressure reset, enthalpy economizer, variable air volume box minimum, chilled water reset, outdoor air damper adjustments, coil cleaning, pump pressure reduction, scheduling non-HVAC equipment, advanced rooftop unit controls, and custom recommissioning measures. Non-residential customers who elect to opt-out of the Demand Side Management/Energy Efficiency Riders, as provided for in N.C.G.S. § 62-133.9(f), are not eligible to participate in this Program.

III. INCENTIVE PAYMENT

The Program provides the eligible participating non-residential customer with an average one-time incentive of \$14,864 per participant. The average incentive may vary depending on the energy efficiency measures utilized and the associated energy savings associated with those measures. Upon receipt of a completed Rebate Application, the Company or its designated contractor will process the completed application, confirm or inspect the installation of the new measures, and forward the incentive payment to the customer within 90 days, unless the customer requests the payment go to the contractor. Rebate applications must be submitted within 45 days of installation. The Company reserves the right to withhold any rebate payment until the customer has satisfactorily completed the application process.

A complete list of rebates by equipment type is available online at [www.dominionenergy.com/savenowNC](http://www.dominionenergy.com/savenowNC).
