**\*IMPORTANT NOTE:** EnergyWise programs are available to Dominion Energy South Carolina residential electric customers. See website for eligibility requirements and restrictions, including Terms and Conditions where applicable.

## Tips to Help You Save!

1. **Set your thermostat at 68°F or lower in the winter and 78°F or higher in the summer.** Each degree higher or lower can significantly increase your heating costs in winter and cooling costs in summer.
2. **Install a smart thermostat for added convenience.** This will allow you to automatically raise or lower the temperature settings when you're asleep or away from home. **Make sure the thermostat is compatible with your HVAC system.**
3. **Check air filters monthly** and change when dirty. Leave interior doors open and don't close vents to allow adequate air flow through your HVAC system.
4. **Periodically check your ductwork for leaks or tears.** Repair fallen or crushed ductwork and use mastic (a plaster-like substance found at your local hardware store) to seal leaks.
5. **Have your central heating and cooling system serviced annually by a professional.** This can extend the life of the system while maintaining optimum efficiency.
6. **Upgrade your attic insulation to a minimum of R-38 (12-14 inches),** which can help save on heating and cooling costs.
7. **Caulk, seal, and weather-strip** around all seams, cracks and openings to protect against drafts. Pay special attention to windows and exterior doors.
8. **Set your water heater at 120°F** and visually inspect the unit for leaks periodically.
9. **Replace standard incandescent light bulbs with ENERGY STAR® LEDs,** which are 90 percent more efficient than incandescent bulbs.
10. **Unplug** appliances, lights, TVs, computers, etc. when not in use or consider installing advanced power strips.

## Home Energy Check-up

Sign up for a **FREE Home Energy Check-up**.

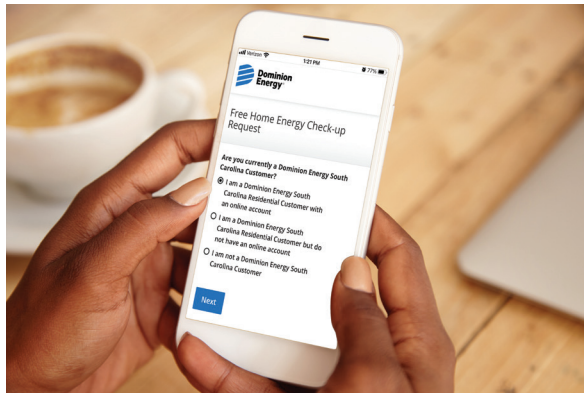

Our Energy Expert will show you how to improve the energy efficiency of your home through the convenience of an in-home consultation, video chat or telephone call. Includes a customized report specific to your home and information on how to access our online tools and resources.

Eligible customers may receive energy-saving products (installed and free of charge) to include\*:

- LED Bulbs
- Kitchen Faucet Aerator
- Water Heater Tank Wrap
- Water Heater Pipe Insulation

Home Energy Check-up is highly recommended for homes 10 years and older and is available to homeowners and renters.

*\*Installed products are not guaranteed and may vary depending on recommendations of the Energy Expert.*

## EnergyWise Savings Store

Establish an online account at [EnergyWiseShop.com](http://EnergyWiseShop.com). Get INSTANT DISCOUNTS on a variety of energy-saving products for your home. Includes ENERGY STAR® certified LED bulbs, Smart Lighting, Smart Thermostats, Advanced Power Strips and more. FREE shipping on qualified orders.

## Appliance Recycling

Get **\$50 cash back and FREE pickup**.

Recycle your old, secondary refrigerator or freezer and save up to \$110 annually on your electric bill. A maximum of two rebates is available per customer account, per year. There's no catch and it's hassle-free. A partner with EPA's Responsible Appliance Disposal Program.

Pick-up is available both inside and outside of the home (i.e. garage, porch or driveway) and is based on customer preference.

*To support removing old, inefficient appliances from the grid, refrigerators and freezers must be full-sized and operable/in-working condition (the compressor should still be humming and the unit should still be cooling).*
