

Survey Work

Belvoir - Gum Springs Rebuild Project

At Dominion Virginia Power, we are committed to providing safe and reliable power to our neighbors. We are planning to replace an aging 230 kilovolt (kV) transmission line along a 2.6-mile stretch between our Belvoir and Gum Springs Substations in Fairfax. The State Corporation Commission issued the final order approving the project September 14, 2016.

Over the next few weeks, in order to comply with current safety and clearance standards, you will see our crews and contractors working to assess forestry requirements before construction begins. Some of the activities will include surveying/marketing right of way boundaries and marking trees for clearing.

Additional updates will be provided before we start installing access roads and staging equipment, and updates will also be posted on the project page at dom.com/belvoir.

We appreciate your patience as this important project is completed in your area. If you have any questions, please contact us at powerline@dom.com or 888-291-0190, Monday-Friday, 7 a.m.-5 p.m.
