Idylwood-Tyson's 230 kV Underground Electric Transmission Project

AT DOMINION ENERGY, we would like to provide an update to the Idylwood-Tyson's Underground Electric Transmission Line Project. On Sept. 5, 2018, the Virginia State Corporation Commission (SCC) issued its final order approving the project. We will begin construction as soon as we receive all necessary permits, which could be as early as November 2019.

We invite you to attend our construction informational open house to learn more about this project and the process of building an underground electric transmission line. There will be no formal presentation, but our electric transmission subject matter experts will be on hand to provide information and answer any questions you may have.

Thank you for your patience as we work to complete this important project.

CONTACT US
