Norris Bridge Transmission Project

Dominion Virginia Power
May 28, 2015
Currently, Dominion Virginia Power operates an overhead 115 kilovolt (kV) transmission line that crosses the Rappahannock River via a combination of structures in the river and attachments to the Route 3-Norris Bridge.

This transmission line provides critical electric power to the lower end of the Northern Neck peninsula, which includes Dominion Virginia Power and electric co-op customers.

– 19,000 customers, including 5800 NNEC members

This transmission line has been in operation since 1962.
Norris Bridge Transmission Line – Current State

Middlesex side looking towards Lancaster
Norris Bridge Transmission Project

- Replace aging infrastructure that has been in place since 1962 and has reached its “end-of-life”

- Gain increased reliability and operational efficiencies by upgrading and relocating the line
  - rebuilding the line to meet current standards and clearances will reduce vulnerabilities of an aging line lessening the risk of outages
  - this will help maintain reliability and reduce the restoration time in the event of an outage

- Maintain safety for Dominion and VDOT crews and lessen potential hazards to the public and watermen
  - relocating off the bridge will lessen the frequency that Dominion and road crews will need to coordinate for line outages or lane closures and reduce road debris from impacting the line.
  - The line will also be built to current Army Corps of Engineers clearances and codes, maintaining up-to-date safety standards for navigable waters.
Norris Bridge Transmission Project

- Project details:
  - Rebuild ~2 miles of line across the Rappahannock River.
  - Replace/remove the existing 7 wood structures currently in the water and remove the 14 bridge attachments.
  - Upgrade and relocate onto 10 steel structures/concrete foundations in the water.
  - Remain on same side as the current transmission line alignment.
    - Approx. 100’ east of bridge

- Dominion is seeking state and federal authority to cross the river.
  - Active permit application pending with VMRC and US Army Corps of Engineers.
  - Anticipate Fall 2015 permit applications approved, begin construction-related activities.
