

Remington – Pratts – Gordonsville 230kV Transmission Project

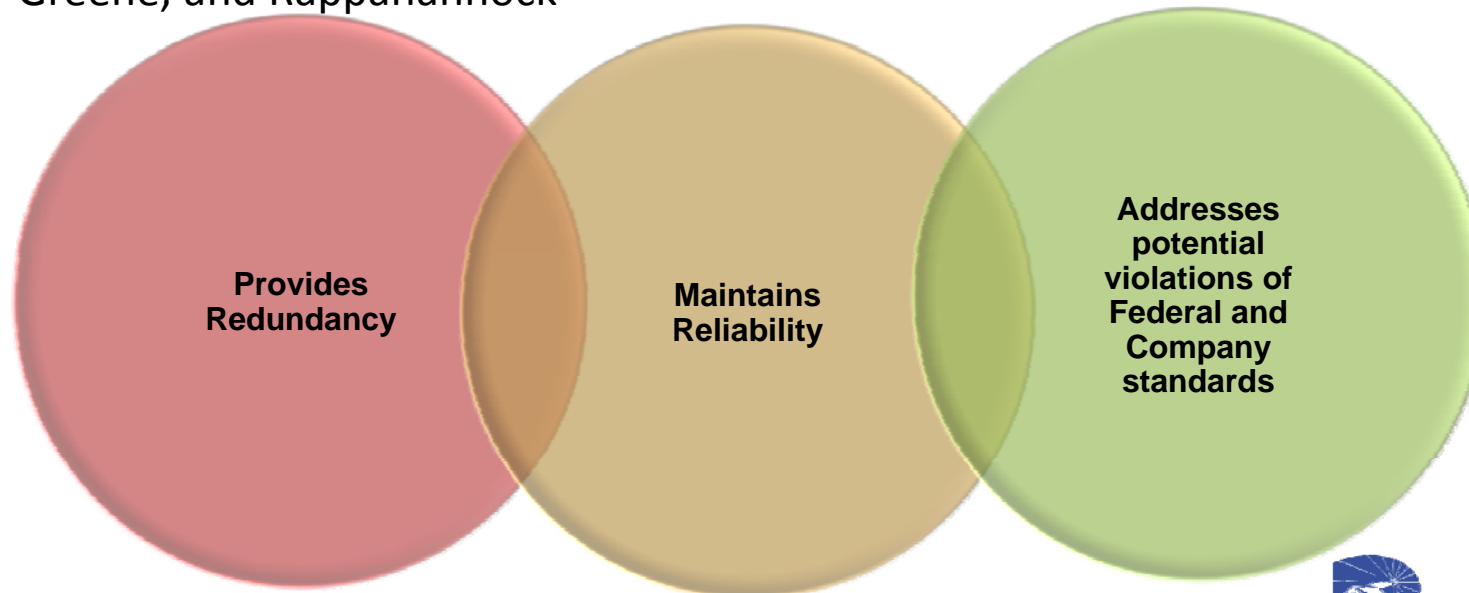

Dominion Virginia Power
May 14, 2015

Project Need

Maintain Reliability and Increase Capacity for Growth

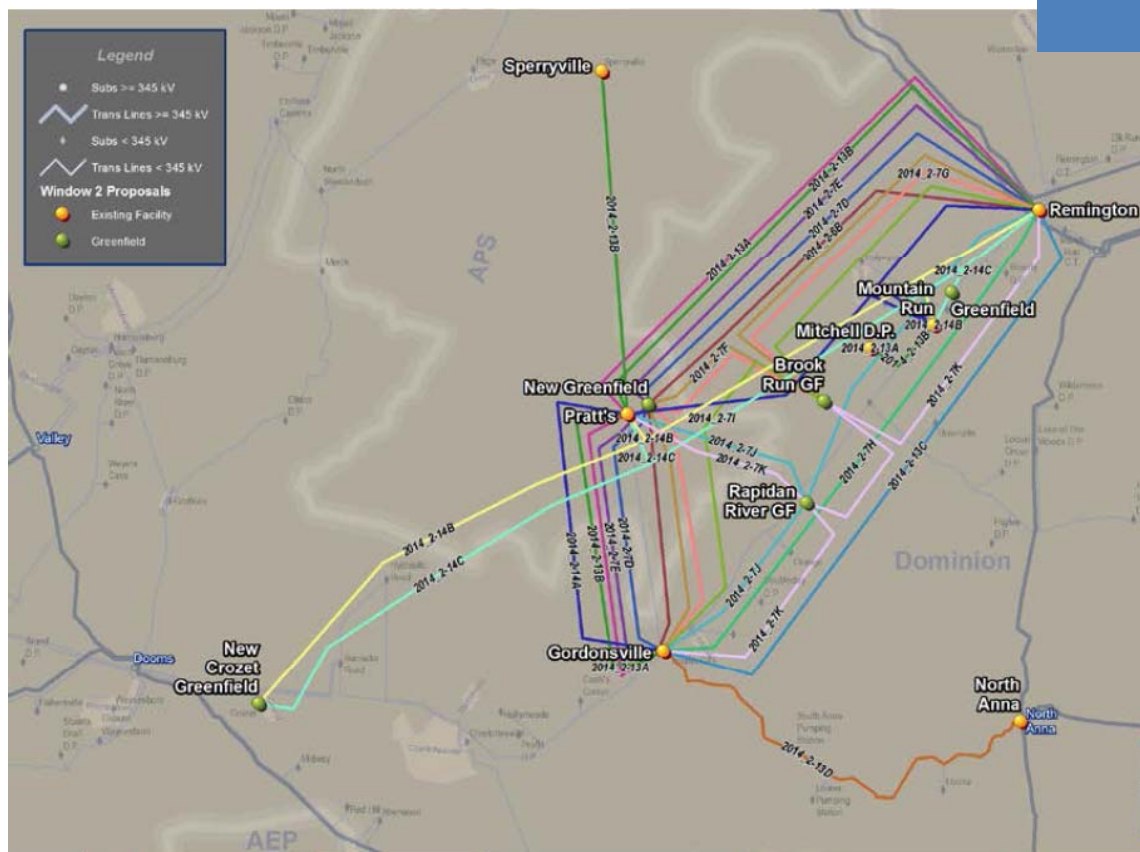

- ❑ Dominion Virginia Power (Dominion) and FirstEnergy are working together on a series of transmission upgrades that will resolve electric reliability issues in the Piedmont region west of Interstate 95 and east of Shenandoah National Park in Virginia.
- ❑ Will maintain reliable electric service for the region and directly benefit more than 25,000 electric customers in six counties: Fauquier, Culpeper, Orange, Madison, Greene, and Rappahannock

Open Window Proposals

Scope:

- ❑ Transmission Owner Criteria, 2019 N-1-1 Thermal, Voltage Drop, Voltage Magnitude and Non-Covered
- ❑ 4 proposing entities
- ❑ 16 proposals
 - 2 TO Upgrades
 - 14 Greenfield
- ❑ Dom and FirstEnergy awarded project February 2015
- ❑ Sperryville portion of main proposal was put on hold by PJM at this time

Community Engagement

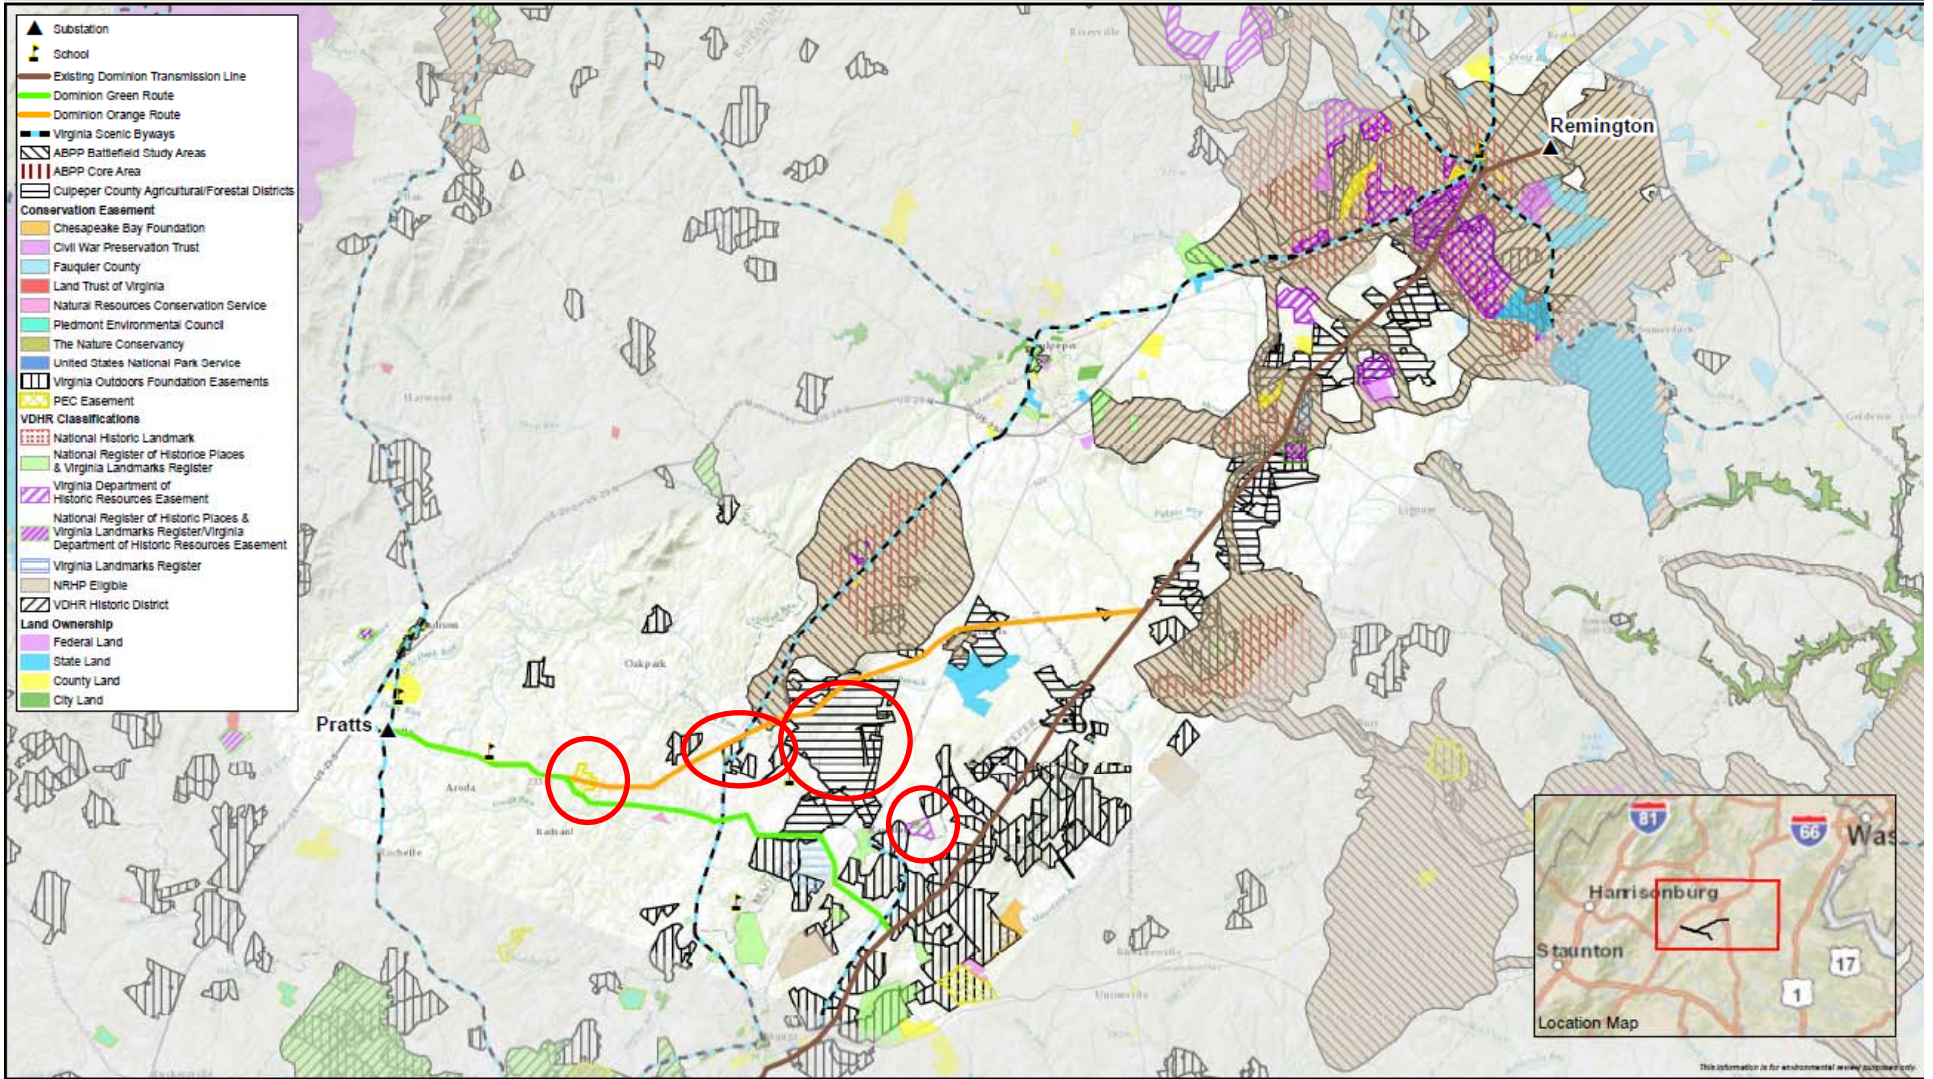

Community Feedback:

- Concerns about potential impact to:
 - Impact to farm land
 - Impact to scenic and historical areas

- Constructive and specific requests to adjust line to better align on property

- Critical information provided on conservation easements, pending conservation easements and land use issues that were unintentional missed in our data collection

Area Constraints

○ = new information gained through public comments and agency outreach

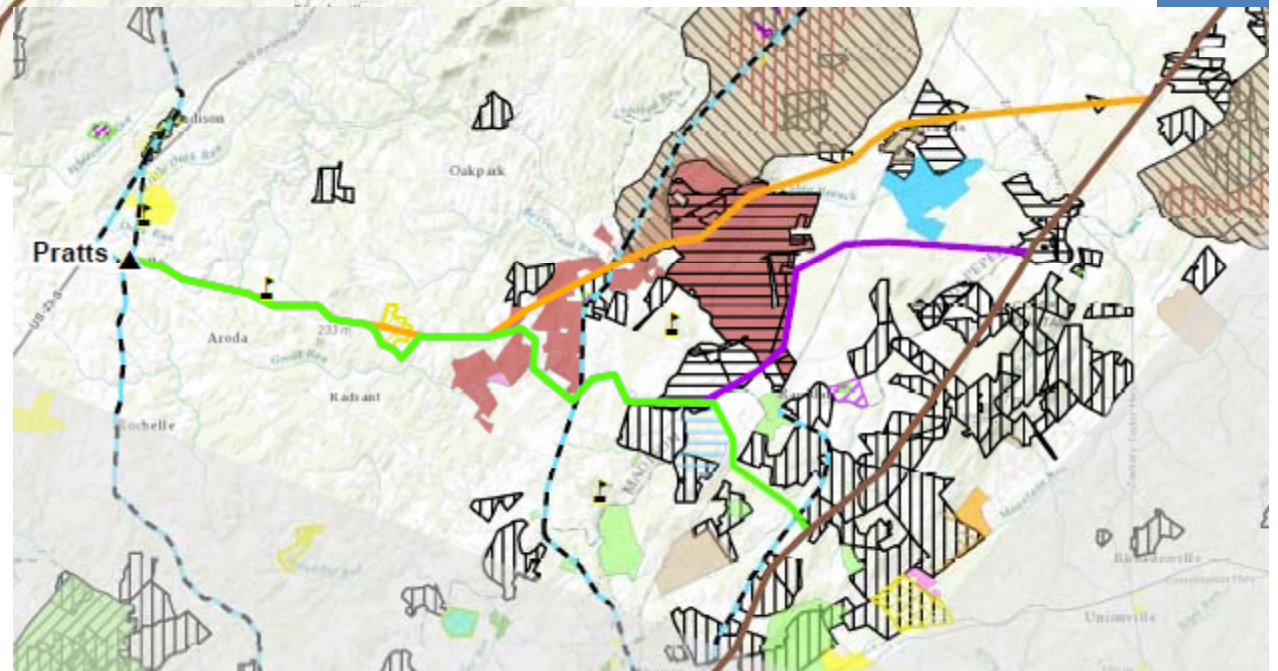

Routing Study
