

Dominion Energy's Non-Residential Heating & Cooling Efficiency Program Helps Ensure Efficiency in Dare County Schools

A new HVAC equipment retrofit is helping Manteo Elementary School achieve strong energy savings through participation in Dominion Energy North Carolina's Non-Residential Heating & Cooling Efficiency Program. The new energy-efficient equipment will help lower operational costs while providing optimal comfort to students, teachers and staff.

THE OPPORTUNITY

Dare County Schools recognizes the importance of responsible facility maintenance to maintain a healthy learning environment for their students, so they took advantage of the opportunity to upgrade heating and cooling equipment at Manteo Elementary School by utilizing Dominion Energy's rebate program.

State-of-the-art equipment provides a higher level of energy performance, increased comfort, energy savings and peace of mind for the school's administration.

SAVINGS AT A GLANCE

- **Incentives paid:** \$2,716
- **Estimated lifetime energy savings:** 11% average reduction of overall heating and cooling costs

PROGRAM BENEFITS

Non-Residential Heating & Cooling Efficiency: The rebate program promotes the installation of high efficiency heating and cooling equipment to reduce energy use. The program provides incentives to qualifying customers that work with a participating contractor to upgrade existing equipment or install new HVAC systems.

Dare County Schools

"The rebate program from Dominion Energy was easy. From application to receipt of the rebate, the entire process was painless. The participating contractor was very easy to work with and made certain there would be no problems down the road.

We are looking forward to the benefits that come from having the new equipment and the savings on our future utility bills. I will certainly take advantage of the program again in the future."
