WHERE DOMINION
ENERGY OPERATES**

Our Footprint

Dominion Energy began as a canal navigation company in Virginia. We found our niche as an electric power company in 1909, and – through mergers, expansion and growth – now own and operate energy infrastructure in some of the fastest-growing regions in the nation.

Power Generation

This operating segment consists of a power generation fleet fueled by nuclear, coal, natural gas, oil, biomass, fuel cells, water, wind and the sun. It provides electricity to utility customers and wholesale power markets, and under long-term contracts with other utilities and municipalities.

Power Delivery

This operating segment consists of 57,900 miles of distribution lines and 6,600 miles of transmission lines, and serves about 2.6 million electric utility customer accounts in Virginia and North Carolina.

Gas Infrastructure

This operating segment has assets in the Appalachian Basin, the mid-Atlantic, the Southeast and the western Rockies. It has gathering, processing, fractionation, storage, transmission, distribution and liquefied natural gas facilities in 12 states and retail energy customer accounts in 14 states.
