Rollins Ford Substation

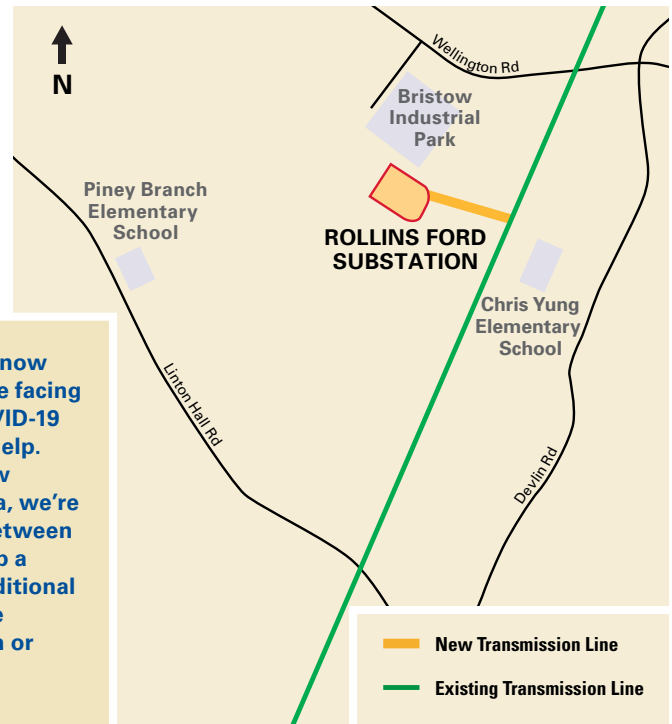

AT DOMINION ENERGY, we are committed to working safely and courteously in the communities we serve. You are receiving this postcard because we are preparing to build a new substation, Rollins Ford Substation, and transmission line in Prince William County, Virginia. This project will help serve new development near Bristow Industrial Park.

Work is scheduled to begin in March 2021. We do not anticipate any interruption to your electric service as a result of this project. Please know that in the wake of the coronavirus. We are mindful of our activities and maintaining property owner interactions with the appropriate social distancing.

Thank you for your patience and understanding as we work to complete this important project. We will update you as activities progress.

CONTACT US — Visit our website at DominionEnergy.com/rollinsford for project updates or voh.dominionenergy.com for information about our construction process. You may contact us by sending an email to powerline@dominionenergy.com or calling 888-291-0190.

At Dominion Energy, we know many of our customers are facing challenges due to the COVID-19 pandemic. We're here to help. In accordance with the law recently passed in Virginia, we're offering payment plans between 6 and 24 months. To set up a payment plan, or view additional assistance options, please visit DominionEnergy.com or call 1-866-366-4357.

WHAT:

This project will build a new 230 kV substation and a 0.3-mile 230 kV electric transmission line, which will connect to an existing transmission line in the area.

WHY:

This project will support load growth in the area.

WHERE:

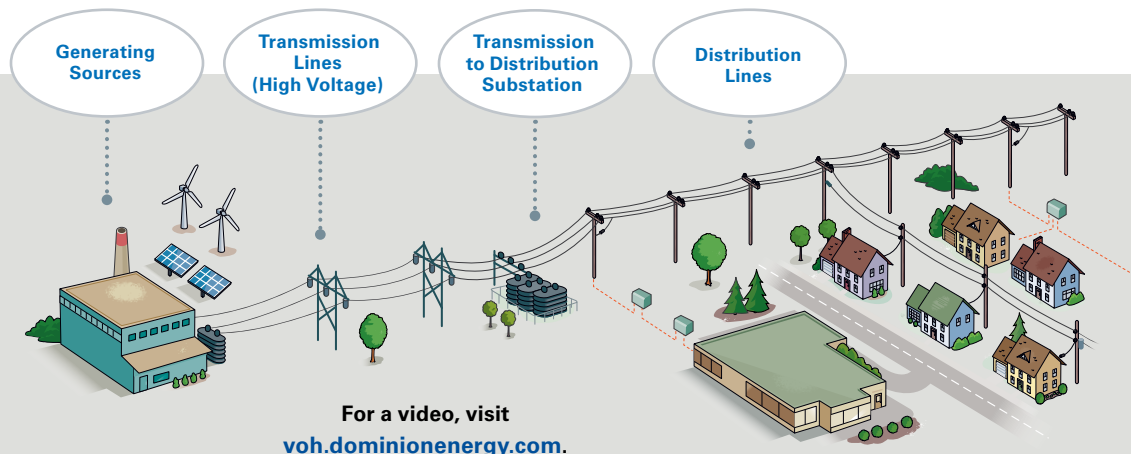

The new substation is located in Prince William County in the area between Wellington Rd. and Linton Hall Rd. near Bristow Industrial Park.

TIMELINE

- March 2021 — Begin construction on new substation
- April 2021 — Prepare right of way and begin construction on new transmission line
- Jan. 2022 — Complete construction
- Spring 2022 — Complete rehab and restoration

Delivering Clean, Safe, Affordable and Sustainable Energy

Transmission lines are the tall, high-voltage lines that carry electricity over long distances from power generation facilities to substations.
